

Coyne American Institute and SBCA Team Up to Offer Residential Certification Classes

Chicago, July 21, 2006 -- Coyne American Institute has formed a partnership with the Satellite Broadcasting and Communications Association (SBCA). The partnership will incorporate SBCA's National Standards and Testing Program (NSTP) Residential Certification course into Coyne's Electronic Systems Technician program.

"SBCA is pleased to have Coyne American Institute as a partner offering the satellite industry's certification program," said SBCA Executive Director Patricia Sumler. "SBCA is working with its members to develop partnerships with regional technical colleges throughout the country as they provide a great avenue for our members to hire qualified technicians," Sumler said.

The Electronic Systems Technician program, more commonly known as EST, prepares graduates to work in the industries of electronics, fiber optics, security systems, audio/video, communications systems, cabling/networking along with computers and related applications in both commercial and residential settings.

The Satellite Broadcasting and Communications Association is the national trade organization representing all segments of the satellite industry. It is committed to expanding the utilization of satellite technology for the broadcast delivery of video, audio, data, music, voice, interactive, and broadband services. Additional information can be found at www.sbca.com.
